

East West University

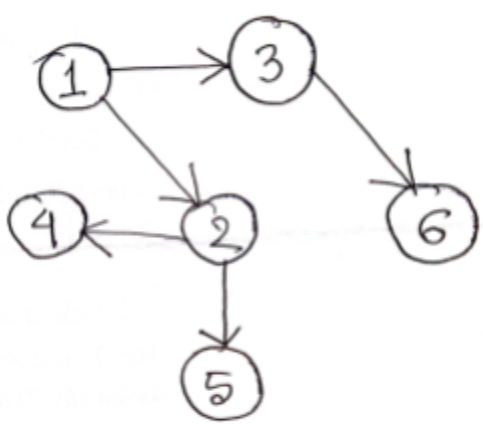

Department of Computer Science and Engineering

Course: CSE246 (Algorithm)

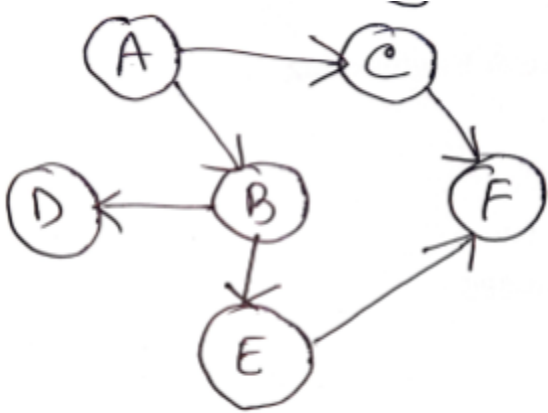

Section:11

Lab Test Examination

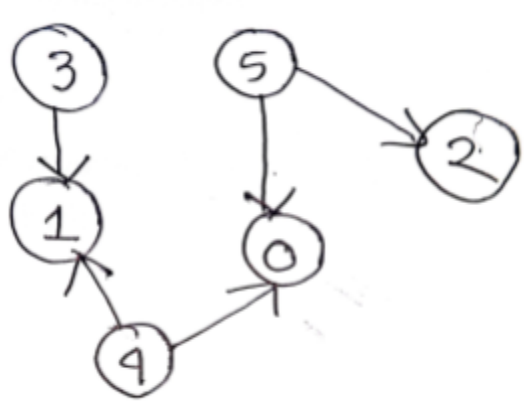

1.

Input	Output
<p>Write a program to perform Breadth-First Search on the following graph:</p>  <p>Starting Node: 1</p>	<p>BFS Traversal: [1, 2, 3, 4, 5, 6]</p>

2.

Input	Output
<p>Write a program to perform Depth-First Search on the following graph:</p> <p>Starting Node: A</p> 	<p>DFS Traversal: [A B D E F C]</p>

3.

Input	Output
<p>Write a program to compute a valid topological ordering of the vertices in the following Directed Acyclic Graph (DAG):</p>  <pre> graph TD 3((3)) --> 1((1)) 5((5)) --> 2((2)) 5((5)) --> 0((0)) 4((4)) --> 1((1)) 4((4)) --> 0((0)) </pre>	<p>Topological Order: [5, 4, 3, 2, 1, 0]</p>

4.

Input	Output
<p>Write a program to implement the Binary Search algorithm. Use the following input:</p> <p>Array: [1, 3, 5, 7, 9, 11, 13]</p> <p>Target: 7</p>	<p>Index of Target: 3</p>

5.

Input	Output
<p>Write a program to implement the Quick Sort algorithm on the following array:</p> <p>Array: [8, 3, 1, 7, 0, 10, 2]</p>	<p>Sorted Array: [0, 1, 2, 3, 7, 8, 10]</p>

6.

Input	Output
<p>Write a program to implement the Merge Sort algorithm on the following array:</p> <p>Array: [12, 11, 13, 5, 6, 7]</p>	<p>Sorted Array: [5, 6, 7, 11, 12, 13]</p>

7.

Input	Output
<p>Implement the 0/1 Knapsack algorithm to solve the following problem:</p> <ul style="list-style-type: none"> Weights: [2, 3, 4, 5] Values: [3, 4, 5, 6] Knapsack Capacity: 5 <p>Your program should calculate the maximum value that can be achieved.</p>	<p>Maximum Value: 7</p>

8.

Input	Output
<p>Write a program to find the length of the Longest Common Subsequence (LCS) for the following strings:</p> <ul style="list-style-type: none"> String 1: "AGGTAB" String 2: "GTXAYB" <p>Output the length of the LCS.</p>	<p>LCS Length: 4</p>

9.

Input	Output
<p>Write a program to solve the Coin Change problem using Dynamic Programming. Use the following inputs:</p> <ul style="list-style-type: none"> Coin Denominations: [1, 2, 5] Target Amount: 11 <p>Your program should calculate the minimum number of coins needed to make the target amount. Display the coins used in the solution.</p>	<p>Minimum Coins: 3 (e.g., [5, 5, 1])</p>

10.

Input	Output
<p>Write a program to implement Dijkstra's algorithm for finding the shortest path in the</p> <p>Graph: { 0: [(1, 4), (2, 1)], 1: [(3, 1)], 2: [(1, 2), (3, 5)], 3: [] }</p> <p>Source Node: 0</p>	<p>Shortest distances: {0: 0, 1: 3, 2: 1, 3: 4}</p>

11.

Input	Output
<p>Write a program to solve the Coin Change problem using the Greedy method. Use the following inputs:</p> <ul style="list-style-type: none">• Coin Denominations: [1, 2, 5]• Target Amount: 11 <p>Your program should output the coins used to make the target amount.</p>	<p>Coins Used: [5, 5, 1]</p>
